

## Test Plan

Testing plan includes initial values from Project 3.a assignment.

- The second test includes a single integer value to make sure the program can handle a single input.
- The third test includes two of the same number to make sure the program can handle integers of the same value.
- The fourth test checks another array of 10 values entered in random order
- The fifth test checks all positive integers (plus 0)
- The sixth test checks all negative integers (plus 0)

Number of integers (Integers entered)	Min/Max
4 (-4, 105, 2, -7)	Min: -7 Max: 105
1 (16)	Min: 16 Max: 16
1 (-6)	Min: -6 Max: -6
2 (3, 3)	Min: 3 Max: 3
10 (-100, -25, -1, -500, 0, 650, 2, 24, 250, 100)	Min: -500 Max: 650
5 (15, 10, 6, 45, 0)	Min: 0 Max: 45
5 (-16, -24, -43, -2, 0)	Min: -43 Max: 0

## Design
